DETAILED ACTION

Allowance

1. Claims 12-21 are allowed over prior art of record.

Reason for Allowance

2. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or suggest, singularly or in combination at least the limitation "etching back a top surface of the CMOS fabricated photodetector array to form recessed regions at the locations of the photoemitter areas in order to reveal the buried electric contact pads; and inserting a plurality of discrete semiconductor photoemitter devices into the recessed regions of the CMOS fabricated photodetector array to make electrical contact with the revealed buried electric contact pads therein" as recited in claim 12, is a major difference between the prior art and the claimed process, and the second major difference between the prior art and the claimed process is "each photoemitter area including at least two buried electric contact pads, comprising steps of: locating photoemitter areas having electrical contact pads; inserting a plurality of discrete semiconductor photoemitter devices onto the photoemitter regions of the CMOS fabricated photodetector array to make electrical contact with the electric contact pads" as recited in claim 19.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References A-D are cited as being related to a process of making optical devices.
